Job Description			
ROLE AND RESPONSIBILITIES Manage team of large-format product assemblers in growing business. Streamline existing assembly systems and protocols for production of RDM shelter kits. Interface with designers and engineers on product design and design as it relates to production efficiency, management of day-to-day activities on production floor and production personnel. Maintain an environment focused on quality and precision.			
QUALIFICATIONS AND EDUCATION REQUIREMENTS <ul style="list-style-type: none"> • 7-10 years' experience in manufacturing/assembly industry • Familiarity and functional knowledge of CAD software, particularly Solidworks 3D CAD • Tool use/knowledge: Familiarity with all basic carpentry & mechanics tools is a must. Some use of power tools (table saw, chop saw, drill & drill press, router, etc) required; familiarity with setup and operation of CNC panel cutters & other basic assembly equipment preferred. 			
PREFERRED ATTRIBUTES: <ul style="list-style-type: none"> • Capable of taking a high-level concept down to executable detail, creative thinking & problem-solving skills, a "get it done" attitude coupled with a high level attention to detail & product quality, good people skills; willingness and ability to mentor and build multiple, flexible production teams. • Must be reliable, team oriented and come with a positive attitude and embrace our entrepreneurial/start-up approach. 			
WHO WE ARE: VISIBLE-GOOD.COM Visible Good designs and produces shelters for humanitarian assistance and disaster relief. Our RDM shelter kits offer a building system which can be assembled by two persons in about an hour with no tools or hardware. For institutions, NGO's and corporations involved in remote location operations or crisis response, a single building system that offers multiple configurations with ease of assembly is of real, practical value. At our production facility in Newburyport, MA, we focus on assembling shelter kits with an eye to quality and detail.
